

SOP 21 - Vigilance

- A. Personnel should be alert to unsafe conditions and see that they are corrected when detected.
- B. Proper training and supervision from management personnel can assist employees in identifying unsafe conditions and in initiating corrective action.
- C. Any employee who sees or otherwise becomes aware of any potentially unsafe condition anywhere at the Location complex should immediately convey that information to his/her supervisor, the Collateral Duty Safety Officer, or Location management. It is the responsibility of every employee to do his or her part to assure that the Location as a whole functions in the safest and most environmentally conscious manner possible.
